

## Assisting SmartLeasing to manage **Vehicle Leasing** smartly with **Salesforce**

### Key Objectives:

- SmartLeasing needed a solution to help them connect with the employers, their employees and the dealers who would provide the vehicle options to the employees.
- The system should cater to all the scenarios of lease management lifecycle, including ability to transfer leases

SmartGroup Corporation (ASX:SIQ), is an Australian Financial Services company offering Salary Packaging, Novated Leasing, Fleet Management & Payroll Administration services.

# Success Story – Vehicle leasing

## Solutions Highlights:

- Integrated Salesforce with multiple 3rd party apps to handle documentation access/approvals, transactional messages, verifications, automobile valuations etc.
- Created a module to ensure smooth smart leasing interactions across employers, employees, and dealers
- Facilitated unified dealer operations within the system, encompassing tasks like confirming vehicle availability
- Incorporated a feature allowing employees to change leased vehicles if their initial selection doesn't meet their expectations.
- Designed processes to ensure that a change in employment of the employee is handled properly with a digital transfer of the same lease.

## Value Delivered:

- Modular design allows for easy scalability, accommodating growth in users and companies participating in the leasing program.
- Streamlined the leasing process, making it effortless for employers, employees, and dealers to interact and collaborate efficiently.
- Simplified lease payment management for employers, reducing administrative burden.
