

Empowering **AlSCO** customers with a self-service portal for **recurring, one-time, and direct sales** orders

Key Objectives:

- Enable existing contract customers to manage recurring service requests and one-time product needs.
- Centralize order management for services, direct purchases, and inventory-based products.
- Provide a secure and accessible digital experience across mobile and desktop.
- Reduce dependency on manual customer service processes and calls.
- Support multilingual branding for global market adaptability.

AlSCO is a global leader in uniform and linen rental, serving healthcare, hospitality, automotive, and manufacturing with tailored rental and hygiene services across Australia, North America, Europe, Asia, and South America.

Solutions Highlights:

- > Developed a Customer Care Portal for modifying service catalog items, placing one-time orders, and purchasing stock via direct sales.
- > Integrated .NET 8 APIs to manage backend data and service logic.
- > Enabled approval flows with secure login and intuitive cart/checkout functionality.
- > Built on Angular 18 for a responsive, single-page application experience.
- > Implemented Auth0 for secure identity access and Single Sign-On (SSO).
- > Ensured WCAG compliance with multilingual support and custom-branded interfaces for global clients.

Value Delivered:

- > Cut service call volume by **50%** with self-service features.
- > Grew upsell/cross-sell revenue by **30%** through catalog and sales options.
- > Achieved **accessibility compliance**, enhancing inclusivity and **ESG** alignment.
- > Boosted mobile usability and order speed by **40%**.
- > Improved satisfaction with **real-time order and contract visibility**.
- > Streamlined deployments via **Azure DevOps CI** pipelines.
