

Digitizing new product development and plant onboarding for Australia's largest brick manufacturer

Key Objectives:

- > Replace paper-based product development processes with a digital workflow
- > Standardize new product onboarding for both manufactured and imported products
- > Enable plant-level imaging and approvals for products added to manufacturing lines
- > Streamline multi-stage approvals across product, pricing, plant, and lab teams
- > Integrate Salesforce with JD Edwards for inventory and pricing automation

BRICKWORKS

Brickworks Limited, founded in 1934, is Australia's largest brickmaker with operations in the U.S. and NZ. It offers building products and services, backed by design studios and a modern digital stack including Salesforce and JD Edwards.

Solutions Highlights:

- > Designed end-to-end product onboarding in Salesforce with dynamic workflows and validation logic.
- > Built role-based dashboards, approval flows, and mass approval features for plant operations.
- > Integrated Oracle JDE with Salesforce using Dell Boomi for post-approval sync.
- > Developed modules for complaints, CAPEX, inventory, and quality grading.
- > Led CRM migrations from Oracle CX, HubSpot, and Dynamics to Salesforce during acquisitions.

Value Delivered:

- > Reduced new product onboarding time by **60%**, replacing manual paper trails
- > Improved cross-departmental collaboration with **dynamic approval routing**
- > Increased product launch speed by **40%**, accelerating time to market
- > Achieved real-time **inventory and pricing sync** across plants via JDE integration
- > Enhanced visibility with interactive dashboards, ensuring stakeholder alignment
- > Enabled smooth onboarding of **3 major acquisitions** onto a unified CRM platform
