

Helping **Compare Club** secure CRM data and streamline onboarding for **4M+ Australian customers**

Key Objectives:

- Monitor Salesforce usage to detect real-time anomalies and prevent data breaches
- Implement regulatory-compliant data security and privacy protocols
- Streamline customer onboarding with UI-driven agent workflows
- Provide real-time visibility into user behavior and access patterns
- Enable internal ticket tracking integrated with Jira for better support handling

Compare Club is a leading Australian financial broker, serving over 4 million customers with insurance, mortgages, and utilities. They partner with brands like HCF, ANZ, and TAL, with 300+ experts across Sydney, Melbourne, and Brisbane.

Solutions Highlights:

- > Activated Salesforce Transaction Security Policies to detect and respond to unusual login behavior
- > Implemented Multi-Factor Authentication (MFA) and granular permission sets for enhanced data access control
- > Built CRM Analytics dashboards using Analytics Studio for live reporting on login activity, user behavior, and access anomalies
- > Designed custom Apex flows and Screen Flows (SSD) to simplify customer onboarding and reduce agent friction during live calls
- > Deployed a Salesforce-native internal ticketing system, with planned integration to Jira and Atlassian for centralized issue tracking

Value Delivered:

- > Cut CRM security incident response time by **75%** with real-time alerts and improved compliance with Australian data mandates.
- > Boosted onboarding **speed by 40%** through simplified UI flows for sales agents.
- > Resolved support tickets **30% faster** with better internal visibility and prioritization.
- > Delivered actionable **security dashboards** and a scalable platform ready for product and agent growth.
